TECHNICAL SKILLS

Languages

JavaScript, TypeScript, C, HTML5, CSS3

Frontend

React, Next.js, Tailwind CSS, HeroUI, Framer Motion, Recharts

Backend

Node.js, Express 5, REST APIs, JWT/JWKS Auth

Database

MongoDB, Aggregation Pipelines, Pagination

Tools

Git/GitHub, VS Code, Stripe, ImgBB, Vercel

EDUCATION

B.Sc. in Computer Science & Engineering

University of Global Village
Barishal, Bangladesh
2025 – Present | Exp. 2028

ACTIVITIES & LANGUAGES

- Competitive Programming (HackerRank)
- Seminars: Git/GitHub, DSA, Discrete Math & Logic
- Bengali (Native)
- English (Professional Working)

PROFILE

Full-stack developer specializing in the MERN stack and Next.js, focused on building production-ready, portfolio-grade web applications. Experienced in role-based systems, secure authentication, RESTful API design, and centralized frontend/backend architecture. Currently pursuing a B.Sc. in Computer Science and Engineering while actively shipping real-world projects.

PROJECTS

PulseLink — *Blood Donation Platform* | *MERN Stack*

- [Live Demo](#)
- [GitHub Repo](#)

- Architected a full-stack blood donation platform with three role-based dashboards (donor, volunteer, admin), each with tailored permissions and workflows.
- Designed centralized serverMutation/serverQuery API helpers with auto-attached JWT tokens, standardizing secure client-server communication across the entire app.
- Implemented Better Auth with JWKS-based JWT verification, enforcing clean server/client component boundaries and removing manual token-handling logic.
- Built cascading Bangladesh District/Upazila location selectors and MongoDB aggregation pipelines (using \$dateTrunc) to power time-series donation trend analytics.
- Integrated Stripe for payments and ImgBB for image hosting, and added server-side pagination to keep data-heavy views fast and responsive.

IdeaVault — *Startup Idea-Sharing Platform* | *MERN Stack*

- [Live Demo](#)
- [GitHub Repo](#)

- Built a startup idea-sharing platform with a custom trending algorithm that ranks and surfaces the most engaging submissions.
- Implemented threaded discussion functionality, enabling nested, readable conversations that keep feedback organized by idea.
- Authored production-quality documentation (README) to present the project professionally to recruiters and collaborators.
